 Richmond

HOW DOES IT WORK?

Just plug the Kill-A-Watt meter into any outlet, plug any appliance or electronic device into the meter, and then monitor their energy usage. Once you've identified your electricity vampires you can repair or replace them, or at least make sure they're unplugged when not in use!

WANT TO TAKE ONE HOME?

See the Accounts Desk, or
Place a hold at yourlibrary.ca –
search “Kill-A-Watt”
